

LT Series

The scissor lift tables with foot-operated hydraulic pump are the ideal tools for a variety of lifting and loading operations and for use as “work station” to provide improved ergonomic conditions together with improved productivity. Available with 150-800 kg nominal capacity, single and double scissor for elevation up to 1300 mm, they represent the best solution for the manual load handling, combining functioning, cost saving, safety and health of operator during work.

150-800 kg

720-1300 mm

ADVANTAGES

COMPACTNESS

- Depending on the model, the table is equipped with a folding handlebar. When fully closed, it becomes very compact and can be stored in a convenient, space saving way.
- Sturdy steel machine designed to transport and pick your goods becoming your reliable partner in the everyday work.
- Easy handling granted by ergonomic handle and the combination of fixed and steering polyurethane wheels.

EASY OF USE

- Thanks to the efficient hydraulic foot pump the table can be brought to the desired height to easily pick or raise working materials.
- With the lever on the handle it is possible to lower the table without clicks with the utmost precision.

SAFETY

- The foot brakes on the steering wheels guarantee perfect stability during operations.
- The practical wheel guards on the steering wheels protect the feet while working.
- The objects raised at an individual and ergonomic height greatly reduce the strain on your back.
- The appropriate inspection supports fix the platform in case of maintenance or cleaning work.

APPLICATION FIELDS

Lift tables are perfect for order preparation and goods mobilization. They are commonly used throughout industry and commerce, including factories, warehouses, retail outlets, printers, schools, colleges, laboratories, banks and offices.
