Scrap dumping containers SL-066-R D

Scatole di inforcazione
Fork jackets

Sistemi movimentati studiati per facilitare la raccolta e lo scarico rifiuti, sfridi e rottami. Il problema della raccolta di rottami e gli sfridi di ogni genere in prossimità dei punti di lavoro, e del loro successivo scarico, viene risolto dalla SALL con una gamma di contenitori specifici espressamente studiati per un semplice e sicuro svuotamento automatico. Inforcabili con carrello elevatore, sono facilmente ribaltabili dall'operatore mediante una leva per svuotare completamente il contenuto senza scendere dal carrello. Si eliminano così le perdite di tempo ed i rischi di

infortuni propri di tutti gli altri sistemi manuali di raccolta e scarico dei rifiuti.

I contenitori porta-rottami ribaltabili SALL sono disponibili in una vasta gamma di modelli con portate differenziate, così da rispondere alle necessità di ogni tipo di azienda: carpenterie, rettifiche, fonderie, vetrerie, falegnamerie, cartotecniche, etc. Dotati di vasche a tenuta stagna, sono facilmente collocabili a mano in posizione di lavoro grazie a quattro ruote di grande diametro (due fisse e due piroettanti) montate su cuscinetti.

Mobile systems designed to facilitate waste and scrap collection and unloading operations. SALL solves the problem of collecting and unloading all types of scraps and wastes near work locations with a range of specific containers specially designed for simple and safe automatic emptying operations. Forkable with lift trucks, they can be easily tilted by the operator using a lever to empty the entire contents without ever getting off the vehicle. This avoids wasting time and prevents accidents that occur with other manual waste collection and unloading systems. The SALL tipping scrap containers are available in a wide range of models with various capacities, thus meeting the requirements of all types of companies: carpentry, joinery and grinding shops, foundries, glassworks, paper mills, etc. Equipped with watertight tanks, they can be easily moved by hand into the work position thanks to four large-diameter wheels (two fixed and two pivoting) mounted on bearings.

A richiesta tutti i portarottami mod. SL/066/R sono disponibili con:

On request, all the scrap containers model SL/066/R can be supplied with:

Valvola regolabile limitatrice di flusso
Adjustable flow limiter valve

Tappi di sfiato aria e ricarica olio
Air bleeding and oil filling plugs

- Vasca di decantazione e rubinetto a sfera per separare le sostanze liquide da quelle solide.
- Setting tank and ball valve to separate liquid and solid substances.

- Impianto idraulico autonomo: cilindro idraulico a doppio effetto, con valvola regolabile limitatrice di flusso, che permette un graduale ribaltamento del portarottami.
- Independent hydraulic plant: two-stage hydraulic cylinder, with adjustable flow limiter valve, that allows the scrap container to tip gradually.

Coperchio in lamiera incernierato sdoppiabile a metà.

Centrally split hinged metal sheet cover.
